

Tips and Techniques

Esthetic Removable Partial (ERP) Line

Team Drake is proud to offer the Esthetic Removable Partial (ERP) Denture line. This innovative line includes the following:

EsthetiClasp™ Removable Partial- The EsthetiClasp™ ERP provides the desired "hidden clasp" effect that all patients appreciate without the added expense of contra-indicated crowns and precision attachments. This product is manufactured with the time tested Vitallium® 2000 Plus products and processing.

Estheti-Flex™ Removable Partial- Developed with the esthetically driven patient in mind, the Estheti-Flex™ ERP provides the ultimate in esthetics and comfort due to the highly flexible thermo-plastic material. This appliance is virtually unbreakable and available in pink or Vita shaded clasps.

Estheti-Flex™ "Duet"- Developed with the esthetically driven patient in mind, the Estheti-Flex™ "Duet" ERP combines the support of a Vitallium® 2000 Plus or Titanium cast framework with the comfort of Estheti-Flex™ tooth colored clasps system for the ultimate in function and esthetics.

ADA Insurance Code	Product Indications	Product Contra-Indications	Recommended Cleaning	Recommended Impression Technique/Material	Doctor Benefits	Patient Benefits	Helpful Hints
Maxillary 5213 Mandibular 5214	The EsthetiClasp™ appliance is recommended for patients with required abutment teeth in the esthetic zone (incisors and bicuspids).	The EsthetiClasp™ design may NOT be indicated for maxillary canines if the patient is edentulous bilaterally in the posterior.	Conventional Denture Cleanser and Toothpaste and Toothbrush	Alginat is recommended if the impression can be poured immediately and separated no later than hour after being poured. Vinyl Polysioxane is the second choice. NO PUTTY WASH MATERIALS SHOULD BE USED.	<ul style="list-style-type: none"> • Esthetic Driven Product • Strength • No Attachment Maintenance • Simplified Case Design • Predictable Delivery 	<ul style="list-style-type: none"> • Optimum Esthetics • No Attachment Maintenance Cost • Lower cost than attachment removable partial denture 	For predictable results, we recommend a set of study casts and bite registration be sent to us for survey, design, and preparation prior to final prep and impression.
Maxillary 5211 Mandibular 5212	The Estheti-Flex™ appliance is recommended for patients with acrylic or metal allergies, unpleasant taste problems associated with particular medications or the desire for the ultimate in stress-free comfort.	The Estheti-Flex™ design may NOT be indicated for Mandibular bi-lateral distal free-end extension cases.	Material: Val Clean Procedure: 5 minute-Overnight soak	Alginat is recommended if the impression can be poured immediately and separated no later than hour after being poured. Vinyl Polysioxane is the second choice. NO PUTTY WASH MATERIALS SHOULD BE USED.	<ul style="list-style-type: none"> • Esthetic Driven Product • Patient Comfort • Durability • Long-term Success (since 1954) 	<ul style="list-style-type: none"> • Comfort • Lightweight • Durable • Improved Esthetics 	For predictable results, we recommend a set of study casts and bite registration be sent to us for case evaluation.
Maxillary 5213 Mandibular 5214	The Estheti-Flex™ "Duet" appliance is recommended for patients requiring cast rests for support combined with Vita shaded clasps for improved appearance in the esthetic zone.	The Estheti-Flex™ "Duet" design may NOT be indicated for Mandibular bilateral distal free-end extension cases.	Material: Val Clean Procedure: 5 minute-Overnight soak	Alginat is recommended if the impression can be poured immediately and separated no later than hour after being poured. Vinyl Polysioxane is the second choice. NO PUTTY WASH MATERIALS SHOULD BE USED.	<ul style="list-style-type: none"> • Esthetic Driven Product • Patient Comfort • Durability • Reparability 	<ul style="list-style-type: none"> • Comfort • Improved Esthetics • Durable 	For predictable results, we recommend a set of study casts and bite registration be sent to us for case evaluation.
